

AB in Bev – Safer Roads for Gurugram

Improving Road Safety in Gurugram through Real-Time Data-Dashboards

The AB in Bev – Safer Roads for Gurugram initiative is a cross industry project aims to bring together key stakeholders to improve road safety conditions.

Currently, the AB in Bev project consists of a data dashboard with multiple views. These include views for the general public and the police and by profile, age-group and location. The dashboard will also provide data on where the accidents took place in Gurugram. This can be used to better understand where accidents are occurring.

In addition, the dashboard will be updated on a quarterly basis for 2019.

This dashboard and visualizations will enable stakeholders to better understand where accidents happening, where black spots are located and enable local stakeholders to take action on road safety conditions.

- Data dashboard
- Real-time data dashboard
- Quarterly data updates
- 3W Mapping
- Admin, User, Police Panel views

- The data dashboard will be used to bring together key stakeholders
- Accessible indicators will enable the improvement of road safety in Gurugram
- User-friendly interfaces
